

Manual Testing of Odoo Accounting Application

Ensuring Financial Accuracy Through Manual QA

PROJECT TEAM

Farah Saleem Bashar Abuhawila Mohammed Bazzar Safa Abuhadeed

Why Testing Matters in Financial Software

Financial Data at Risk

Errors in invoicing, tax calculations, or ledger entries can cause real monetary losses and compliance failures.

User Trust

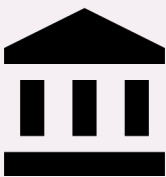

System bugs in financial modules directly impact stakeholder confidence and operational efficiency.

Validation Gap

Modern ERPs like Odoo have intricate interdependencies that require rigorous validation across modules.

Manual QA fills the gap between automation and real-world usage.

Odoo

Accounting Module

Open-source ERP used by
tens of thousands of
companies worldwide

Why We Chose Odoo

Market Leader

Odoo is a top-tier open-source ERP used by millions of businesses worldwide for critical operations.

Modular Architecture

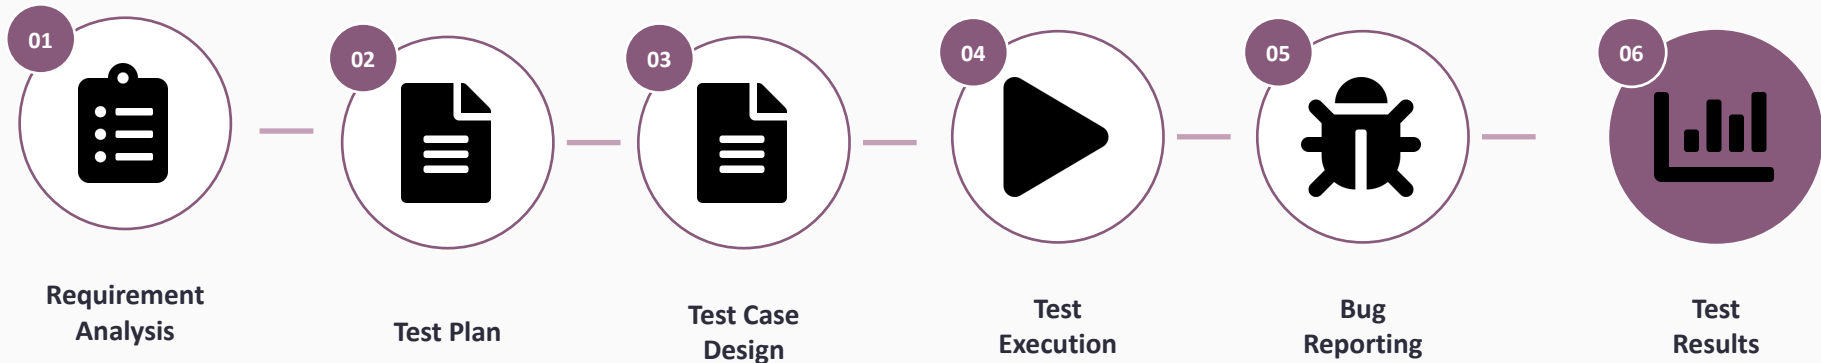

Its accounting module integrates seamlessly with sales, inventory, and purchasing for end-to-end workflows.

Real-World Relevance

Testing a widely-used industry tool provides high-value QA experience applicable to enterprise environments.

From Requirements to Results — Our QA Process

Key Areas Tested

- ✓ Customer Invoices & Payments
- ✓ Vendor Payments & Refunds
- ✓ Transactions, Liabilities & Assets
- ✓ Period Closing Procedures
- ✓ Customer Products & Data Validation

Tools Used

We utilized industry-standard tools to manage the testing lifecycle and team collaboration.

Tools Used - Trello

The screenshot displays a Trello board titled "Odoo/Accounting-Functional Testing". The board is organized into five columns representing days of the week:

- Day2 - Monday:** Contains one card titled "Orange hrn blocked".
- Day3 - Tuesday:** Contains five cards:
 - "Trello board and cards" (Due: Mar 10 - Mar 10, Assignee: FS)
 - "Creat Jira Board" (Due: Mar 10 - Mar 10, Assignee: MB)
 - "Requirement Analysis & Discussion" (Due: Mar 10 - Mar 11, Assignees: FS, B, MB, SA)
 - "SRS" (Due: Mar 10 - Mar 11, Assignees: B, MB)
 - "Test Plan Draft" (Due: Mar 10 - Mar 13, Assignee: FS)
- Day4 - Wednesday:** Contains four cards:
 - "Customer TC" (Assignee: MB)
 - "Vendors payment TC" (Assignee: FS)
 - "Assets & liabilities TC" (Assignee: SA)
 - "Product TC" (Assignee: B)
- Day5 - Thursday:** Contains four cards:
 - "Prova" (Due: Mar 12, Assignees: FS, B, MB, SA)
 - "Test Execution" (Assignees: FS, B, SA, MB)
 - "Bug Report" (Assignees: SA, MB)
 - "Test Summary Report" (Assignees: B, FS, MB, SA)

At the bottom of each column is an "Add a card" button. The background of the board is a landscape image of a rocky, desert-like terrain.

Structured, Traceable, and Repeatable Test Cases

1

Requirement-Linked

Every test case maps to a specific functional requirement

2

Clear Preconditions

Defined system state before each test begins

3

Step-by-Step Steps

Reproducible actions with expected vs. actual results

4

Pass / Fail Criteria

Objective outcome definition for every test

Sample Test Case

TC-ID	TC-ACC-017
Module	Customer Invoices
Title	Verify tax on qty change
Priority	High
Precondition	Invoice in Draft state
Steps	Modify line item quantity
Expected	Tax auto-recalculates
Status	PASS ✓
